ABOUT

We are an office-based vascular intervention surgical facility in Brooklyn, NY, providing quality dialysis access management and peripheral vascular disease care for the community. We are open Monday through Friday. We are also open Saturdays for emergencies only.

OUR VISION

Our vision is to be the destination of choice for dialysis access management. Our mission is helping dialysis centers and patients reduce hospital admissions, increase the use of fistulas, and reduce the use of catheters. This vision/mission is aimed at helping dialysis centers to meet their quality metrics and therefore improve quality of care for dialysis patients.

CORE VALUES

- Ensuring respect, courtesy and professionalism in treating patients and their families
- Ensuring confidentiality of patient information
- Ensuring the highest level of patient safety
- Ensuring cultural sensitivity in treating each patient
- Ensuring all care givers are qualified by training and certification at all levels and all times. patient

OUR SERVICES

DIALYSIS ACCESS MANAGEMENT

We offer quality dialysis access management services for the renal patient population, including the following:

- Vein Mapping
- Central Venous Catheter
- Angiogram, Fistulogram, Angioplasty, Declot (Thrombectomy), stent placement
- Management of steal syndrome using banding techniques to reduce flow

PERIPHERAL ARTERIAL DISEASE CARE

Peripheral vascular disease (PVD) is a common circulatory disease that most commonly appears in the legs. It could be due to occlusion of arterial blood flow or venous insufficiency, leading to varicose veins. We diagnose and treat PVD using various minimally invasive techniques

Visit our website www.flatlandsaccess.com to learn more about these treatments and their associated conditions.

ONLINE REFERRALS

FMA Dialysis Access offers online patient referral forms through our website flatlandsaccess.com

If you are a patient call us at (718) 338-5024 to make an appointment.
